**Subject:** net metering (PSC Docket #2005-385-E)

August 7, 2013

Ms. Boyd,

I request that net metering be discussed on September 12, 2013.

Few South Carolinians realize the gold mine shining down upon them--as our state ranks among the best for sunlight available for solar power generation. Unfortunately, being a poor state, many of the locales do not have the wherewithal to make use of this resource.

Growth in South Carolina brings concern that our power grid cannot support it and calls for more power plants. Yet the obvious, best solution is distributed power generation via solar. Commerce is the solution.

The topic and its issues need prompt attention and discussion for the benefit of everyone.

I do not work for a solar company. Nor can I afford solar panels. I wish I could.

Regards,  
Leonard DiAsio
